

K-12 Approved Core (Tier 1) Content Textbooks Tier 2 and 3 Intervention Materials

Definitions

TBOE Regulation 2510: Adoption of Textbooks

"Textbook" means the principal source of instructional material for any given course of study, in whatever form the material may be presented, which is available or distributed to every pupil enrolled in the course of study.

TBOE Regulation 2414: Programs and Services for Pupils in High Poverty and In High Need School Districts

High need school districts are required to provide programs and services that focus on improving instruction in literacy and mathematics.

A high poverty school district for the purposes of this policy means a school district in which forty percent or more of the pupils are "at risk" as defined in N.J.S.A. 18A:7F-45.

Tier 1 Core Instructional Interventions provide preventive, proactive services for all students in all settings

Tier 2 Targeted Group Interventions provide high efficiency and rapid response for some students at-risk of academic failure.

Tier 3 Intensive, Individual Interventions provide intensive, explicit and systematic procedures of longer duration that are assessment-based

TBOE Regulation 2530: Resource Materials

"Resource materials" are all those sources of information for the use of pupils that have not been designated as textbooks and generally must be shared by individual pupils. Resource materials include reference books, fiction and nonfiction books, maps, audio and audio-visual materials, CD ROM's, pamphlets, periodicals, pictures and on-line references. Resource materials may be maintained in classroom library collections and/or in the school library or media center.

Board Approved: May 31, 2016

The Trenton Board of Education approves annually all core and supplementary content-area curricular materials and tools addressing the Multi-tier Model Academics and Behavior. All purchases of these materials and tools are to be approved by the Chief Academic Officer. These materials and tools are aligned to the District Instructional Framework for implementation of effective teaching and learning within each academic content area and classroom. Textbooks, materials and tools are recommended by content area supervisor with approval by the Chief Academic Officer.

Note: The District Instructional Framework is the plan for teaching and learning, K-12, and includes time allocation, frequency of progress monitoring, data analysis and reporting of outcomes. Support for the implementation of Curriculum, Instruction and Assessment is provided through ongoing professional learning programs with additional support provided upon request via email to the Curriculum Content Supervisor.
