

“America’s continued global leadership will depend on our students’ abilities to interact with the world community both inside and outside our borders.”

—Committee for Economic Development

RosettaStone 
Education

At we help prepare the next generation to join the global community. To thrive in that expanding environment students must learn to communicate with their international peers. Therefore, one of our key goals is to help them become bilingual.

We selected Rosetta Stone® Classroom to help us succeed. Our students and faculty now can access this award-winning program that teaches learners to read, write, speak, and understand a new language.

This language-learning program is built on a series of easily recognizable images found in everyday situations, enabling children to progress quickly. It supports students in a number of ways, including the following:

- **24/7 access to language instruction, in the classroom and at home**
- **Individualized language learning—at students’ own pace**
- **Speech-recognition tools to guide students to more accurate pronunciation**
- **Interactive speaking activities that help students build confidence prior to speaking in class**
- **Secure online environment that includes interaction only with other Rosetta Stone students at**

We believe that for students joining an increasingly globalized economy, learning a new language is an advantage, for all that comes next. Please contact me if you have any questions.

Sincerely,
